

TEACHER NOTES

This activity is:

- No prep! Just project it on the wall/smart board and start!
- Not specific to any grade level. It could be done with youngsters like 1-2 grade, and also with much older students (high schoolers as well!).
- These statements are fun, inclusive, and relatable to students' summer experiences while connecting to technology.
- Perfect for that back to school time when you need to break the ice and start a conversation in your Technology class.
- Great at adding some movement to your class, for the perfect brain break.

You can have a discussion with the students about their answers and the current statement right after they all "answer" by standing up or sitting.

For more fun moments I have added stomping and thumbs up as things to do, with cute background statements that are not just about Technology. My students always laugh at those, because they don't expect them to be included.

STAND UP
